A Letter to Our Shareholders

2010 Delta Electronics Annual Report – Business Summary

As Delta Electronics celebrates its fortieth anniversary in 2011 and the beginning of our fifth decade, we look back at the year 2010, which crowned forty years of remarkable achievement. In 2010, the Company's revenues, profits, and market value surpassed all previous records. We solidified our leading position in power management and components, and continued our multi-year effort in developing renewable energy, energy-saving and new energy technologies. Delta also made major progress in such advanced business areas as industrial automation, display solutions, solar energy, LED lighting, and electric vehicle control systems and full-car power train systems. These efforts are not only in step with global green energy trends but also drive the future growth of Delta. We summarize our business results of the past year and the outlook for the future below.

Delta Electronics' 2010 consolidated sales revenues were NT\$171.3 billion, increasing 38% compared to the previous year; gross profit was NT\$36.6 billion, or 21.4% of revenues, representing 37% growth from the previous year; net operating profit was NT\$17.3 billion, or 10.1% of revenues, increasing 40% from the previous year. Net income after tax was NT\$15.8 billion, or 9.2% of revenues, rising 35% from the previous year. Earnings per share was NT\$6.69 in 2010.

Delta's global market share in switching power supplies has stayed at number one since 2002. In recent years, we have aggressively brought into new applications our longtime accumulated power electronics technologies as well as other innovations, fortifying Delta's industry leadership and its contribution to global energy efficiency. Last year, Delta introduced a green telecommunication power solution, successfully integrating renewable energy with an existing high-efficiency telecommunication power system, and thus winning business from telecommunication operators in India and Mainland China. Delta not only maintained its number one market share, but also helped customers achieve their goals of reducing energy consumption and carbon emissions.

In addition to the power supply business, Delta also ranks number one globally in brushless DC fans. Through advanced high-efficiency thermal technologies, we are able to help customers solve system-level heat dissipation issues, improve energy efficiency and recycle energy. With efficient energy technologies such as variable frequency servo motors and drives, Delta helps customers renovate labor-intensive legacy factory equipment with cutting edge automation technologies, dramatically reducing their reliance on labor and electricity. Delta has also been developing the China market. Along with expanding distribution networks and setting up closer partnerships, we

have established logistics centers as well as intelligent information systems to monitor market trends and respond in a timely manner. As a result, in 2010 Delta could contend with first-tier industrial names from Europe, America, and Japan in the China market. As labor shortages, wage inflation, energy conservation and carbon reduction issues continue unabated, the potential for Delta's industrial automation business is significant.

Delta's display solution business continues to spearhead into professional areas such as home and commercial cinemas, high-end large-venue conference projection systems, and large outdoor LED displays. It also leads the industry in developing LED ultra-short-throw projectors, 3D high quality projection systems, and glass-less 3D displays. Combining with system software technologies, our large real-time interactive monitoring systems and 360-degree surround video walls are also widely praised. Delta displayed its world-leading 3D projection systems at the 2010 Taipei International Flora Exposition's Palace of Dreams and EXPO Theater. Our participation highlighted the urgency of global warming and environmental protection, and promoted the use of innovative, clean and efficient energy solutions.

Delta's strategy for renewable energy is reaching new milestones. In solar energy, our subsidiary DelSolar focuses on developing solar cells and modules, and targets expanding its capacity to over one gigawatt this year. In 2010, besides introducing solar inverters with 98% efficiency and a high-precision solar tracking system, Delta also expanded its solar system business into overseas markets. For example, we partner with a major U.S. food distributor for solar projects that operate on an innovative leasing model, and we completed a landmark solar system on the city hall roof of historical Zhenjiang City in China, based on our superior design capabilities and our experience building the solar energy system for the Kaohsiung 2009 World Games Stadium. Wind power is another market with enormous potential. In addition to small wind power generators and systems, Delta has developed several megawatt level large-scale wind power inverters for generators ashore or offshore, to further strengthen the Company's green energy portfolio.

Delta is also focusing on LED lighting and electric vehicles. Current LED light bulbs are nine times more efficient than traditional light sources, and still improving. LED bulbs also enjoy lifetimes of over forty thousand hours, which translates into 11 years of 10-hour usage everyday without having to replace the bulb. Offering greater energy efficiency and a much longer life, but lacking the

mercury pollution of fluorescent lamps, LED bulbs are the ideal eco-friendly energy-saving lighting product. The general public is reluctant to deploy LED bulbs due to the cost difference. However, with superior longevity and energy efficiency, LED lighting is more economical than other lighting technologies. Delta has successfully developed high-efficiency indoor and outdoor LED lighting systems. Last year, we introduced high color rendition LED light bulbs that have the number one efficiency rating in Taiwan, and are the first to obtain TÜV certification. Delta has become a recognized LED lighting manufacturer and we are successfully developing green business opportunities and winning business from renowned international customers. Delta is also devoting great effort to the area of hybrid and pure electric vehicles, providing major multinational automobile companies with chargers and power converters. We have also begun road testing hybrid cars with full power train systems that integrate Delta's captive automatic control, motor drive, servo motor, and power electronics technologies. The performances are exceeding expectations.

With our emphasis on long-term development, Delta continues to strengthen through expanding R&D centers and developing talent. The construction of Taoyuan Plant 3 will finish this year and we will establish the global research and development center of our Industrial Automation business. The Pingjhen Plant was acquired last year to become our main manufacturing base for e-paper. DelSolar has boosted its capacity in Zhunan to cope with increasing market demand. Developing green energy technology is Delta's corporate mission and social commitment, and we know that humanity must pursue sustainable growth. We believe the advanced technologies such as solar energy, LEDs, electric vehicles, e-paper, and fuel cells that we have dedicated ourselves to over the years will bear fruit. We are committed to providing the market with new products and services, reduce greenhouse gas emissions, and contribute to the protection of our earth.

Delta's achievements are receiving global recognition. In 2010, the management team won honors such as the CNBC China Business Leader of the Year and Asia Innovator of the Year awards, and Ernst & Young Entrepreneur of the Year and CSR Entrepreneur awards. In addition, we have received best-of-the-best awards from customers such as ASUSTeK, Cisco, and Rockwell, in recognition of our dedicated efforts. Delta's fulfillment of corporate social responsibilities was also recognized last year: We were ranked number one for Corporate Citizenship by CommonWealth Magazine and won its Most Admired Company award in the electronics industry for the 9th consecutive year, and we were also rated A+ for the third time for the Securities and Futures Institute's Information Transparency and Disclosure Ranking. We are devoted to corporate social responsibility and we strive to continuously enhance Delta's international standing.

We sincerely offer our gratitude to our Delta colleagues who have achieved their targets through dedicated effort, and to our customers, suppliers, shareholders, and the public for their support. Together we will continue to build on Delta's four full decades of achievement as we pursue our mission to contribute to a greener planet and a better tomorrow.

Corporate Governance

"Maintain sound corporate governance and strictly abide by commercial and ethical standards" is a core commitment at Delta. We view this as a fundamental requirement for a responsible company, and we are dedicated to realizing this ideal in our everyday operations.

At Delta, the board currently consists of nine directors and two supervisors, including one independent director and one independent supervisor. The board chairman does not hold an administrative position within the company. The remuneration for directors and supervisors is no more than 1% of the distributed balance.

To enhance the board's responsibility and trust, it convenes at least once quarterly. The board convened on six occasions in 2010, and the overall attendance rate was 94%. Key resolutions passed by the board are published in a timely manner on the Market Observation Post System of the Taiwan Stock Exchange and in the corporate governance section of the Delta website. Other relevant documents are also provided online for reference. An internal audit team submits its audit report to the supervisors monthly, and the Chief Auditing Officer presents critical findings to board members at board meetings.

The Board organized the Compensation Committee to evaluate the overall compensation policy, the compensation of the company's directors and officers, and carry out other assignments by the board. The Committee is composed of at least three directors from the Board, and at least one of the committee members is an independent director. In addition, the chief director of the Human Resources Department joins the committee as a councilor without a right to vote. Committee members are prohibited from approving their own or relevant parties' compensation.

The core areas of the company are R&D, manufacturing, and sales. We do not participate in businesses of high-risk and highly leveraged investment. Delta consistently monitors capital on the market and interest rates, makes cautious funding decisions, and hedges against foreign exchange rate risks. Simultaneously, through our departments of auditing, finance, corporate investment, legal and intellectual property, and more, we are able to assess and manage risks associated with all operations to maintain company sustainability.

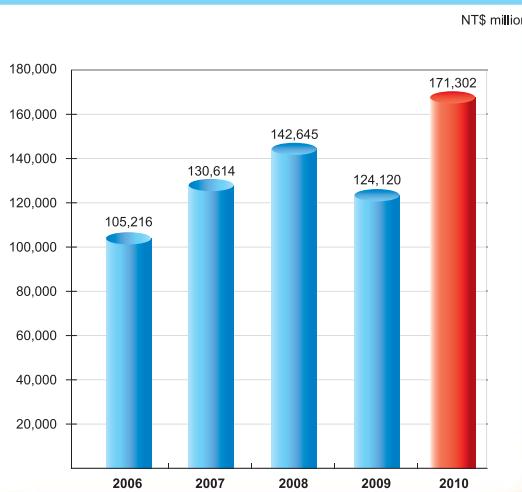

Delta's efforts in corporate governance continued to win outside recognition in 2010. Besides winning Commonwealth Magazine's corporate citizen award and Yazhou Zhoukan's 2010 "Global Chinese Business 1000-Best Performance Award", Delta placed first as Commonwealth Magazine's top electronics company since 2002. We received an A+ rating once again from the Securities and Futures Institute in Taiwan in 2010. Moreover, our top management received "CNBC Asia Innovator of the Year", the "China Business Leaders Awards 2010", and Ernst & Young's "Entrepreneur of the Year". We will continue to improve the quality of corporate governance at Delta by strengthening the organization and function of the board to make Delta an even more respectable world-class corporation.

To Delta Electronics, Inc.

We have audited the accompanying consolidated balance sheets of Delta Electronics, Inc. and subsidiaries as of December 31, 2009 and 2010, and the related consolidated statements of income, of changes in stockholders' equity and of cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. As explained in Note 1. 2), we did not audit the 2009 and 2010 financial statements of certain consolidated subsidiaries, which statements reflect total assets of \$624,861,000 and \$827,514,000, constituting 0.47% and 0.51% of the consolidated total assets as of December 31, 2009 and 2010, respectively, and total operating revenues of \$1,636,521,000 and \$2,713,720,000, constituting 1.32% and 1.58% of the consolidated operating revenues for the years then ended, respectively. In addition, we did not audit the financial statements of certain long-term equity investments, accounted for under the equity method. Long-term equity investments in these companies amounted to \$5,782,830,000 and \$5,217,792,000, constituting 4.32% and 3.22% of the consolidated total assets as of December 31, 2009 and 2010, respectively, and total investment income was \$316,569,000 and \$786,455,000, constituting 2.08% and 3.90% of the consolidated income before income tax and minority interest for the years then ended, respectively. Those statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts and the information disclosed in Note 11. 2) included for such subsidiaries and investee companies, is based solely on the reports of the other auditors.

We conducted our audits in accordance with the “Rules Governing Examination of Financial Statements by Certified Public Accountants” and generally accepted auditing standards in the Republic of China. Those standards and rules require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Delta Electronics, Inc. and subsidiaries as of December 31, 2009 and 2010, and the results of their operations and their cash flows for the years then ended in conformity with the “Rules Governing the Preparation of Financial Statements by Securities Issuers” and generally accepted accounting principles in the Republic of China.

As described in Note 3, effective January 1, 2009, Delta Electronics, Inc. and its subsidiaries adopted the amendments to R.O.C. Statement of Financial Accounting Standards No. 10 “Accounting for Inventories”.

The consolidated financial statements of Delta Electronics, Inc. and subsidiaries as of and for the year ended December 31, 2010, expressed in US dollars, are presented solely for the convenience of the reader and were translated from the financial statements expressed in New Taiwan dollars using the exchange rate of NT\$29.12 to US\$1.00 at December 31, 2010. This basis of translation is not in accordance with generally accepted accounting principles in the Republic of China.

PricewaterhouseCoopers Taiwan

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements of the Company and its subsidiaries (collectively referred herein as the Group) are prepared in accordance with the "Rules Governing the Preparation of Financial Statements by Securities Issuers" and generally accepted accounting principles in the Republic of China. The Group's significant accounting policies are summarized as follows:

1) Basis for preparation of consolidated financial statements

All majority-owned subsidiaries and controlled entities are included in the consolidated financial statements, and the Company prepares consolidated financial statements on a quarterly basis. The income (loss) of the subsidiaries is included in the consolidated statement of income effective the date on which the Company gains control over the subsidiaries. The income (loss) of the subsidiaries is excluded from the consolidated statement of income effective the date on which the Company loses control over the subsidiaries.

Significant inter-company transactions and assets and liabilities arising from

inter-company transactions are eliminated.

2) Translation of financial statements of foreign subsidiaries

Assets and liabilities of foreign subsidiaries are translated into New Taiwan dollars using the exchange rates at the balance sheet date. Equity accounts are translated at historical rates except for beginning retained earnings, which are carried forward from prior year's balance. Dividends are translated at the rates prevailing at the date of declaration. Profit and loss accounts are translated at weighted-average rates of the year. Exchange differences are recorded as cumulative translation adjustments and are included as a component of the stockholders' equity.

3) Foreign currency transactions

- (1)The Company and its consolidated subsidiaries maintain their accounts in New Taiwan dollars and their respective functional currencies, respectively. Transactions denominated in foreign currencies are translated into New Taiwan dollars and the respective functional currencies at the spot exchange rates prevailing at the transaction dates.
- (2)Monetary assets and liabilities denominated in foreign currencies are translated at the spot exchange rates prevailing at the balance sheet date. Exchange gains or losses are recognized in profit or loss.
- (3)When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss shall be recognized in profit or loss. Conversely, when a gain or loss on a non-monetary item is recognized directly in equity, any exchange component of that gain or loss shall be recognized directly in equity. However, non-monetary items that are measured on a historical cost basis are translated using the exchange rate at the date of the transaction.

4) Classification of current and non-current items

- (1)Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - A. Assets arising from operating activities that are expected to be realized or consumed, or are intended to be sold within the normal operating cycle;
 - B. Assets held mainly for trading purposes;
 - C. Assets that are expected to be realized within twelve months from the

- balance sheet date;
- D. Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.
- (2) Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
- A. Liabilities arising from operating activities that are expected to be paid off within the normal operating cycle;
 - B. Liabilities arising mainly from trading activities;
 - C. Liabilities that are to be paid off within twelve months from the balance sheet date;
 - D. Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date.

5) Cash equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant risk of change in value resulting from fluctuations in interest rate.

The Group's statement of cash flows is prepared on the basis of cash and cash equivalents.

6) Settlement date accounting

If an entity recognizes financial assets using settlement date accounting, any change in the fair value of the asset to be received during the period between the trade date and the settlement date is not recognized for assets carried at cost or amortized cost. For financial asset or financial liability classified as at fair value through profit or loss, the change in fair value is recognized in profit or loss. For available-for-sale financial asset, the change in fair value is recognized directly in equity.

7) Financial assets and financial liabilities at fair value through profit or loss

- (1) Derivative financial instruments and convertible bonds are recognized and derecognized using settlement date accounting and are recognized initially at fair value.
- (2) Financial assets and financial liabilities at fair value through profit or loss are

subsequently remeasured and stated at fair value, and the gain or loss is recognized in profit or loss. The fair value of listed stocks and OTC stocks is based on latest quoted fair prices at the balance sheet date. If the convertible bonds were invested before the adoption of EITF 99-256 of the Accounting Research and Development Foundation, R.O.C., dated October 8, 2010, “Accounting for private placement of convertible bonds,” when the fair value of the derivatives embedded in the hybrid instruments cannot be measured reliably, they are subsequently remeasured and stated at cost.

- (3) Financial assets and financial liabilities are designated as financial assets and liabilities at fair value through profit or loss when either of the following conditions is met:
- A. The financial asset or financial liability designated is a hybrid contract.
 - B. It eliminates or significantly reduces a measurement or recognition inconsistency.
 - C. It is designated and its performance is evaluated on a fair value basis.

8) Available-for-sale financial assets

- (1) Equity investments are recognized and derecognized using trade date accounting and are recognized initially at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.
- (2) Available-for-sale financial assets are remeasured and stated at fair value and the gain or loss is recognized in equity. When the financial assets are derecognized, the cumulative gain or loss shall be removed from equity and recognized in profit or loss. The fair value of listed stocks and OTC stocks is based on latest quoted fair prices at the balance sheet date.
- (3) If there is any objective evidence that the financial asset is impaired, the cumulative loss that had been recognized directly in equity shall be removed from equity and recognized in profit or loss. Impairment losses recognized previously in profit or loss for an investment in an equity instrument shall not be reversed through profit or loss, and if, subsequently, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss shall be reversed, with the amount of the reversal recognized in profit or loss.

9) Financial assets carried at cost

- (1) Investment in unquoted equity instruments is recognized or derecognized using trade date accounting and is stated initially at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.
- (2) If there is any objective evidence that the financial asset is impaired, the impairment loss is recognized in profit or loss. Such impairment loss cannot be reversed.

10) Investments in bonds without active markets

- (1) Investment in bonds without active markets is recognized and derecognized using settlement date accounting and is recognized initially at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.
- (2) This financial asset is carried at amortized cost.
- (3) If there is any objective evidence that the financial asset is impaired, the impairment loss is recognized in profit or loss. If, subsequently, the fair value of the asset increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the previously recognized impairment loss shall be reversed to the extent of the amount of the amortized cost that would have been recognized at the date the impairment is reversed.

11) Derivative financial instruments for hedging

Derivatives are initially recognized at fair value on the date a contract is entered into and are subsequently remeasured at their fair value. The method of recognizing the resulting gain or loss depends on whether the derivative is designated as a hedging instrument and the nature of the hedged item.

- (1) Fair value hedges: Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognized in profit or loss. Changes in the fair value of the hedged asset or liability that are attributable to the hedged item are recognized in profit or loss as an adjustment to the carrying amount of the hedged item.
- (2) Cash flow hedges: The effective portion of changes in the fair value of

derivatives that are designated and qualify as cash flow hedges is recognized in equity.

- A. If a hedge of a forecast transaction subsequently results in the recognition of a financial asset or a financial liability, the associated gains or losses that were recognized directly in equity are transferred to profit or loss in the same period or periods when the hedged item affects profit or loss.
- B. If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset or a non-financial liability, the associated gains and losses that were recognized directly in equity, are reversed and included in the initial cost or other carrying amount of the asset or liability.

12) Allowance for doubtful accounts

- (1) Allowance for doubtful accounts is provided based on an evaluation of the collectibility and the aging analysis of ending balances of notes, accounts and other receivables, taking into account the bad debts incurred in prior years.
- (2) The amount of allowance for doubtful accounts is calculated monthly using a percentage range for overdue accounts receivable based on the aging analysis. The related percentages of provision recognized were as follows:

Overdue days	1~15 days	16~30 days	31~60 days	61~90 days	91~180 days	181~365 days	Over 365 days
Percentage provided	None	0. 5%	2. 5%	15%	25%	50%	100%

- (3) Accounts receivable due from related parties which exceed regular credit terms are reclassified to other receivables and the related allowance for doubtful accounts is calculated individually based on the evaluation of the collectibility.

13) Inventories

Effective January 1, 2009, the Group adopted the amendments of R.O.C. SFAS No. 10, "Accounting for Inventory". The Group uses the perpetual inventory system. Inventories are recorded at standard cost and variances are allocated to inventories and cost of goods sold at the balance sheet date. At the end of year, inventories are evaluated at the lower of cost or net realizable value, and the individual item approach is used in the comparison of cost and net realizable value. The calculation of net realizable value is based on the estimated selling price in the normal course of business, net of estimated costs of completion and estimated

selling expenses.

14) Funds and investments

- (1) Long-term equity investments accounted for under the equity method
 - A. Long-term equity investments in which the Company holds more than 20% of the investee company's voting shares or has the ability to exercise significant influence on the investee's operational decisions are accounted for under the equity method. The excess of the initial investment cost over the acquired net asset value of the investee attributable to goodwill is no longer amortized effective January 1, 2006. Retrospective adjustment of the amount of goodwill amortized in previous years is not required. The excess of acquired net asset value of investee over the initial investment cost is allocated proportionately and applied as a reduction to the book values of identifiable non-current assets, and any remaining amount of such excess after this allocation is credited to Extraordinary gains. However, negative goodwill prior to December 31, 2005 is continuously amortized.
 - B. Pursuant to EITF 92-047 of the Accounting Research and Development Foundation, R.O.C., dated February 25, 2003, of the Republic of China, for shares transfer among parent company and subsidiaries, the carrying value of long-term investments transferred is the book value of the investment. The difference between payment for the equity and acquisition cost is recorded as capital reserve or retained earnings.
 - C. Exchange differences arising from translation of the financial statements of overseas investee companies accounted for under the equity method are recorded as "cumulative translation adjustments" under stockholders' equity.
 - D. The Company credits long-term equity investments accounted for under the equity method when cash dividends are declared by investee companies on ex-dividend date.

(2) Cash surrender value of life insurance

The cash surrender value of life insurance is recorded as an asset and classified as long-term investment. The increase in cash surrender value during the period is accounted for as an adjustment to insurance premiums paid.

15) Business combination

Business combination transactions are accounted for in accordance with R.O.C SFAS No. 25, “Business Combination” using the purchase method. Acquisition price is purchase cost plus costs directly attributable to the acquisition. The excess of the acquisition price over the acquired net asset fair value of the merged business is recognized as goodwill. The allocation period of the acquisition price shall not exceed one year after the date of acquisition.

16) Property, plant and equipment

- (1) Property, plant and equipment are stated at cost except for land which is carried at appraised value.
- (2) Depreciation is provided on a straight-line method over the estimated lives of the assets. Leasehold improvements are amortized over the life of the leases. Salvage value of the fully depreciated assets that are still in use is depreciated based on the re-estimated economic service lives.

The Group uses \$1 (depending on their respective reporting currency) as salvage value after 2001.

The estimated useful lives of fixed assets are 2 to 8 years, except for buildings which are 5 to 55 years.

- (3) Major renewals and improvements are capitalized and depreciated accordingly. Maintenance and repairs are charged to expense as incurred. When an asset is sold or retired, the cost and accumulated depreciation are removed from the respective accounts and the resulting gain or loss is included in current non-operating results.
- (4) “Assets leased to others” were reclassified to “other assets” at their carrying value. Depreciation expense incurred in current period is accounted for as non-operating expense.
- (5) Property, plant and equipment that are idle or have no value in use are reclassified to “other assets” at the lower of their fair value less costs to sell or book value. The resulting difference is included in current operations. Depreciation provided on these assets is charged to non-operating expense.

17) Intangible assets

- (1) In accordance with the amendments to R.O.C. SFAS No. 25, "Business Combination", goodwill arising from business combination is no longer amortized and should be tested for impairment annually or more frequently.
- (2) Land use rights acquired in Mainland China are amortized on a straight-line basis over the contractual period or other legal rights.
- (3) Intangible assets other than goodwill and land use rights, mainly patents, customer relationships and technology authorization fees, are amortized on a straight-line basis over 3~12 years.

18) Deferred charges

Deferred charges are recorded at actual cost and amortized over the estimated useful lives based on the straight-line method.

19) Impairment of non-financial assets

- (1) The Group recognizes impairment loss when there is indication that the recoverable amount of an asset is less than its carrying amount. The recoverable amount is the higher of the fair value less costs to sell and value in use. The fair value less costs to sell is the amount obtainable from the sale of the asset in an arm's length transaction after deducting any direct incremental disposal costs. The value in use is the present value of estimated future cash flows to be derived from continuing use of the asset and from its disposal at the end of its useful life.
- (2) When the impairment no longer exists, the impairment loss recognized in prior years shall be recovered. However, impairment loss of goodwill is not recoverable.

20) Retirement plan

- (1) Under the defined benefit pension plan, net periodic pension costs are recognized in accordance with the actuarial calculations. Net periodic pension costs include service cost, interest cost, expected return on plan assets, and amortization of unrecognized net transition obligation and gains or losses on plan assets. Unrecognized net transition obligation is amortized on a straight-line basis over the employees' remaining service period.

- (2) Under the defined contribution pension plan, net periodic pension costs are recognized as incurred.

21) Income tax

- (1) The Company and certain subsidiaries adopt the inter-period and intra-period allocation of income tax. Over or under provision of prior years' income tax liabilities is included in the current year's income tax expense. When a change in the tax laws is enacted, the deferred tax liability or asset is recomputed accordingly in the period of change. The difference between the new amount and the original amount, that is, the effect of changes in the deferred tax liability or asset, is recognized as an adjustment to current income tax expense (benefit).
- (2) Investment tax credits arising from expenditures incurred on acquisitions of equipment or technology, research and development, employees' training, and equity investments are recognized in the year the related expenditures are incurred.
- (3) An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- (4) The Company and subsidiaries registered in Taiwan adopt the "Income Basic Tax Act". If the amount of regular income tax is equal or more than the amount of basic tax, the income tax payable shall be calculated in accordance with the Income Tax Act and other relevant laws. Whereas, if the amount of regular income tax is less than the amount of basic tax, the income tax payable shall be equal to the basic tax. The difference between the regular income tax and basic tax shall not be subject to deductions of investment tax credits granted under the provisions of other laws.
- (5) Some of the Company's overseas subsidiaries adopt the liability method.

22) Share-based payment — employee compensation plan

- (1) The employee stock options granted from January 1, 2004 through December 31, 2007 are accounted for in accordance with EITF 92-070, EITF 92-071 and EITF 92-072 of the Accounting Research and Development Foundation, R.O.C., dated March 17, 2003. Under the share-based employee compensation plan, compensation cost is recognized using the intrinsic value

method and pro forma disclosures of net income and earnings per share is prepared under the fair value method.

- (2) When share-based payment awards held by employees of the acquiree are replaced by the acquirer's share-based payment awards due to a business combination and are changed to be settled by the equity instruments of the acquirer, the services already received, which are measured by reference to the fair value of the equity instruments granted, should be recognized as acquisition cost for the vested portion, and the unvested portion shall be accounted for as payroll expenses of the acquiree during the remaining vesting period, in accordance with EITF 97-017 of the Accounting Research and Development Foundation, R.O.C., dated January 18, 2008, "Accounting for Share-based Payment Transactions Provided by Stockholders or Affiliated Companies".

23) Employees' bonuses and directors' and supervisors' remuneration

Effective January 1, 2008, pursuant to EITF 96-052 of the Accounting Research and Development Foundation, R.O.C., dated March 16, 2007, "Accounting for Employees' Bonuses and Directors' and Supervisors' Remuneration", the costs of employees' bonuses and directors' and supervisors' remuneration are accounted for as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and the amounts can be estimated reasonably. However, if the accrued amounts for employees' bonuses and directors' and supervisors' remuneration are significantly different from the distributed amounts resolved by the Board of Directors, then the differences shall be adjusted retroactively in current year's gain or loss and, if the accrued amounts for employees' bonuses and directors' and supervisors' remuneration are significantly different from the actual distributed amounts resolved by the stockholders at their annual stockholders' meeting subsequently, the differences shall be recognized as gain or loss in the following year. In addition, according to EITF 97-127 of the Accounting Research and Development Foundation, R.O.C., dated March 31, 2008, "Criteria for Listed Companies in Calculating the Number of Shares of Employees' Stock Bonus", the Company calculates the number of shares of employees' stock bonus based on the closing price of the Company's common stock at the previous day of the stockholders' meeting held in the year following the financial reporting year, and after taking into account the effects of ex-rights and ex-dividends.

24) Earnings per share

- (1) The Company has a complex capital structure. Pursuant to the R.O.C. SFAS No. 24, "Accounting for Earnings Per Share", an enterprise with complex capital structure shall present both basic EPS and diluted EPS. The calculations of basic EPS and diluted EPS are as follows:
 - A. Basic EPS: The amount of earnings (or loss) per share is computed by dividing the amount of net income (or loss) attributable to common stock outstanding for the reporting period by the weighted average number of common shares outstanding during that period.
 - B. Diluted EPS: The calculation of diluted EPS is consistent with the calculation of basic EPS assuming that all dilutive potential common shares have been converted into common shares at the beginning of the reporting period and the amount of net income (or loss) attributable to common stock outstanding for the reporting period has been adjusted by the after-tax effect of any other changes in income or expense that would result from the conversion of the dilutive potential common shares.
- (2) The Company's potential common shares are the employee stock options issued by the Company and employees' bonus that could be distributed in the form of stock. The treasury stock method will be used to test whether or not potential common shares have dilutive effect in calculating diluted EPS.

25) Revenue, cost and expense recognition

Revenue is recognized when the earning process is substantially completed and is realized or realizable. Costs and expenses are recognized as incurred.

26) Accounting estimates

The preparation of consolidated financial statements in conformity with generally accepted accounting principles in the Republic of China requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the balance sheet date and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those assumptions and estimates.

3. CHANGE IN ACCOUNTING PRINCIPLE

Effective January 1, 2009, the Group adopted the amendments of R.O.C. SFAS No. 10, "Accounting for Inventories". As a result of this change in accounting principle, operating costs decreased by \$411,358, net non-operating gains decreased by \$451,882, minority interest income decreased by \$12,045, and investment loss accounted for under the equity method increased by \$4,500 for the year ended December 31, 2009. Further, consolidated net income decreased by \$32,979 and basic earnings per share decreased by \$0.01 (in dollars) for the year ended December 31, 2009.

- (3) The subsidiaries, DIH and DNH, do not maintain an employee retirement plan. However, certain subsidiaries of DIH and DNH, located in Mainland China maintain a defined contribution retirement plan covering all employees. Under the plan, the employees of DIH and DNH subsidiaries contribute to a

separate fund an amount based on a certain percentage of the monthly basic salary of the employees. Further, each DIH's and DNH's subsidiary also provides pension reserves for its employees for amounts depending on the employee's position. As of December 31, 2009 and 2010, the pension reserves of DIH's and DNH's subsidiaries were \$814,997 and \$876,445, respectively.

- (4) NPL, DEJ and the subsidiaries of DIH and DNH located in the United States have defined contribution plans in accordance with the local regulations.
- (5) Effective July 1, 2005, the Company and the subsidiaries registered in Taiwan have established a defined contribution pension plan under the Labor Pension Act (the "New Plan") for eligible employees holding Republic of China citizenship. The Company and the subsidiaries registered in Taiwan deposit the pension amount based on 6% of the employees' monthly salaries and wages into each employee's personal pension account with the Bureau of Labor Insurance. For the years ended December 31, 2009 and 2010, the pension costs of the Company and these subsidiaries were \$167,024 and \$205,283, respectively.

17) Common stock

- (1) In accordance with the Company's Articles of Incorporation, the total authorized common stock is 2,700,000,000 shares (including 100,000,000 shares for stock warrants conversion). As of December 31, 2010, the total issued and outstanding common stock was 2,394,798,000 shares with par value of \$10 (in dollars) per share.
- (2) On December 20, 2004, the Board of Directors of the Company adopted a resolution that allowed certain stockholders to issue 16,000,000 units of global depository receipts (GDRs), represented by 80,000,000 shares of common stock (Deposited Shares), a unit of GDR represents 5 shares of common stock. After obtaining approval from SFB, these GDRs were listed on the Securities Exchange of Luxembourg, with total proceeds of US\$134,666,000. The issuance of GDRs was represented by outstanding shares, therefore, there is no dilutive effect on the common shares' equity. The main terms and conditions of the GDRs are as follows:

A. Voting rights

GDR holders may, pursuant to the Depositary Agreement and the relevant

laws and regulations of the R.O.C., exercise the voting rights pertaining to the underlying common shares represented by the GDRs.

B. Sales and redemption of the underlying common shares represented by the GDRs

When the holders of the GDRs request the Depositary to redeem the GDRs in accordance with the relevant R.O.C. regulations and the provisions in the Depositary Agreement, the Depositary may (i) deliver the underlying common shares represented by the GDRs to the GDR holders, or (ii) sell the underlying common shares represented by the GDRs in the R.O.C. stock market on behalf of the GDR holder. The payment of proceeds from such sale shall be made subject to the relevant R.O.C. laws and regulations and the provisions in the Depositary Agreement.

C. Distribution of dividends, preemptive rights and other rights and interests of GDR units bear the same rights as common shares.

D. After considering the increase in shares from the stock dividend distribution year by year, as of December 31, 2010, there were 3,990,000 units outstanding, representing 19,948,000 common shares of the Company's common stock.

18) Capital reserve

The R.O.C. Company Law requires that the capital reserve shall be exclusively used to offset against accumulated deficit or increase capital and shall not be used for any other purpose. The capital reserve can be used to offset against accumulated deficit only when legal reserve and special reserve are insufficient. Only capital reserve from paid-in capital in excess of par value and donated surplus can be used to increase capital and the total amount shall be limited to 10% of outstanding capital each year.

19) Legal reserve

The R.O.C. Company Law requires that the Company shall set aside 10% of its net income as legal reserve after offsetting against prior years' losses until the legal reserve equals the Company's capital. The legal reserve can be used only to offset against accumulated deficit or increase capital. The legal reserve can be used to increase capital only when the reserve exceeds 50% of the Company's capital, and shall be limited to 50% of the excess portion of the reserve.

20) Undistributed earnings

(1) As stipulated in the Company's Articles of Incorporation, the current year's earnings, if any, shall be distributed in the following order:

- A. Payment of all taxes and dues.
- B. Offset against prior years' operating losses, if any.
- C. Set aside 10% of the remaining amount as legal reserve.
- D. Set aside a certain amount as special reserve, if necessary.
- E. The amount of distributable earnings after deducting items A, B, C and D, plus beginning undistributed earnings (the earnings), shall be distributed in the following percentage according to the resolution approved at the stockholders' meeting:
 - a) Directors' and supervisors' remuneration: up to 1% of the earnings.
 - b) Employees' bonus: at least 3% of the earnings. In addition, in accordance with the shareholders' resolution at their annual meeting on May 19, 2005, the Company can issue the employee stock bonus to qualified employees of subsidiaries. The related regulations should be authorized by the Company's Board of Directors or authorized person.
 - c) Stockholders' bonus: balance of the earnings after deducting a) and b).

(2) The Company's dividend policy is summarized below:

As the Company operates in a volatile business environment and is in the stable growth stage, the residual dividend policy is adopted taking into consideration the Company's financial structure, operating results and future expansion plans. According to the dividend policy adopted by the Board of Directors, at least 50% of the Company's earnings shall be appropriated as dividends, and cash dividends shall account for at least 5% of the total dividends distributed.

(3) The distribution of 2008 and 2009 earnings was approved by the shareholders during their meeting on June 10, 2009 and June 15, 2010, respectively. Details are summarized below:

	2008		2009	
	Dividends per share		Dividends per share	
	<u>Amount (Note A) (in dollars)</u>		<u>Amount (Note B) (in dollars)</u>	
Legal reserve	\$ 1,025,092		\$ 1,165,747	
Stock dividends	218,505	\$ 0.1	-	\$ -
Cash dividends	7,647,660	3.5	10,012,785	4.2
Capitalization of capital reserve	218,505	0.1	-	-

(Note A) The shareholders during their meeting had approved to distribute employees' stock bonuses of \$1,622,675, employees' cash bonuses of \$270,466 and directors' and supervisors' remuneration of \$16,200.

(Note B) The shareholders during their meeting had approved to distribute employees' cash bonuses of \$2,156,670 and directors' and supervisors' remuneration of \$16,700.

As of March 2, 2011, the distribution of 2010 earnings had not been approved by the Company's Board of Directors. The information will be posted in the "Market Observation Post System" of the Taiwan Stock Exchange Corporation.

- (4) The Group's estimated amounts of employees' bonus and directors' and supervisors' remuneration for 2009 and 2010 are \$2,492,808 and \$31,220, and \$3,484,085 and \$21,180, respectively. The basis of estimates is based on a certain percentage of net income prescribed by the Company's Articles of Incorporation and resolved by the Board of Directors, after taking into account the legal reserve and other factors. The calculation of shares of stock bonus distributed is based on the closing price of the Company's common stock at the previous day of the next stockholders' meeting after taking into account the effects of ex-rights and ex-dividends. While, if the estimated amounts are different from the amounts approved by the stockholders subsequently, the difference is recognized as gain or loss in 2011. However, if the accrued amounts for employees' bonus and directors' and supervisors' remuneration are significantly different from the distributed amounts resolved by the Board of Directors, then the differences shall be adjusted retroactively in the statements of income for the year ended December 31, 2010. The actual distribution of 2009 earnings was as stated in the previous paragraph. The

resolved amounts of the bonus to employees and to directors were consistent with the resolutions during the shareholders' meeting and the same amount had been charged against earnings for 2009.

- (5) The Taiwan imputation tax system requires that any undistributed current earnings, on tax basis, be subject to an additional 10% corporate income tax if the earnings are not distributed in the following year.
- (6) As of December 31, 2009 and 2010, details of tax credits of the Company are as follows:

(4)DEP and DII are considered as high and new technology enterprises which can apply the preferential tax rate of 15%.

(5)Under the PRC tax regulations, the corporate income tax of DDG shall be levied at the preferential rate of 15 percent as it was classified as high-tech enterprise after government review. Furthermore, because its additional investment in 2007 is included in the incentive items specified in the

“Catalogue for the Guidance of Foreign Investment Industries”, the tax payable for the income from the additional investment can be calculated separately. Thus, for this part, DDG is exempt from corporate income tax for the first and second profit-making years and is subject to a 50% reduction of corporate income tax from the third through fifth profit-making years. Year 2010 is the first year wherein DDG can apply the 50% reduction of corporate income tax, with a tax rate of 12.5 %.

- (6)Effective January 1, 2009, DWH is subject to the laws of the People’s Republic of China on Enterprise Income Tax, and the rate of enterprise income tax is 22%. DWH has an accumulated deficit, and accordingly, income tax is not recognized.
- (7)Under the PRC tax regulations, CES is exempt from corporate income tax for the first and second profit-making years and is subject to a 50% reduction of corporate income tax from the third through fifth profit-making years. Year 2010 is the second year wherein CES can apply the 50% reduction of corporate income tax.
- (8)As of December 31, 2010, the status of the Company’s and its subsidiaries’ assessed and approved income tax returns are as follows:

7. COMMITMENTS AND CONTINGENT LIABILITIES

The Group's major commitments as of December 31, 2010 were as follows:

- 1) As of December 31, 2010, the future lease payments and the net present value discounted at 1.08%, one-year time deposit interest rate given by the Chunghwa Post Co., Ltd. are as follows:

Year	Amount
2011	\$ 129,271
2012	124,965
2013	93,733
2014	11,170

2016~2020 (the net present value is \$20,807)	22,672
2021~2023 (the net present value is \$11,958)	13,603
	<u>\$ 399,948</u>

- 2) In October 2007, the Company entered into an agreement with the Institute of Nuclear Energy Research, Atomic Energy Council, Executive Yuan, R.O.C. for technology authorization of Concentrating Photovoltaic Modules. The contract is valid through October 2017. In addition to the authorization fee of \$5,000, the Company commits to pay royalties based on a certain percentage of total sales from the day the authorized products are sold and the maximum amount of the royalty is \$100,000. As of December 31, 2010, the Company has paid the authorization fee totaling \$5,000 and royalty fee totaling \$621 to the Institute of Nuclear Energy Research. Further, the Company entered into an agreement with the Institute of Nuclear Energy Research for the temporary termination of the above agreement for two years whereby the Company cannot use the technology

authorization during such period.

- 3) The Company entered into a software purchasing and advisory services agreement with total future payments of approximately \$105,528.
- 4) On December 17, 2010, the Company entered into a public bidding for the cash capital increase of Allied Material Technology Corp. (AMT) and expected to acquire 99.96% stock ownership by cash in the amount of \$2,710,000. The Company had signed subscription contract with AMT and will remit the money on the target date fixed by AMT after finishing its capital reduction according to its execution on plan of reorganization. Further, the Company has no control and significant influence on AMT from the time the cash is remitted up to the time AMT completes its reorganization under the subscription contract.
- 5) The Group entered into contracts for the construction of new factories and buildings, and the acquisition of equipment with total future payments of approximately \$1,863,588.

6) DelSolar's long – term purchase contracts

- (1) DelSolar signed long-term purchase contracts with 7 materials suppliers with contract periods from December 2006 to December 2018. According to the contracts, DelSolar agreed to pay those suppliers certain amounts in installments; suppliers shall provide DelSolar with materials as DelSolar makes prepayments for purchases. Such prepayments may be offset against the relevant purchase amounts or be returned. As a result of the imbalance between supply and demand in the solar energy industry, the solar cell trade is making silicon wafer unit price modification arrangements with silicon wafer suppliers. As of December 31, 2010, DelSolar had signed memorandums of understanding (MOU) with 4 suppliers, specifying unit price modification mechanisms.
- (2) A reconciliation arrangement was contracted by DelSolar and its materials supplier - Swiss Wafer AG, one of the 7 materials suppliers stated in the first paragraph, due to Swiss Wafers AG's default on its delivery commitment to the silicon wafer supply contract. After negotiations, Swiss Wafers AG still could not fulfill the commitment. On March 18, 2010, DelSolar filed a lawsuit against Swiss Wafers AG to protect its creditor's rights, which is being tried under the Betreibungsamt Weinfelden Bahnhofstrasse 22 8570 Weinfelden Switzerland. According to the contract, the maximum loss to DelSolar is the

total balance of prepayments accrued as at December 31, 2010 amounting to US\$3,553 thousand, which might be uncollectible from Swiss Wafer AG. As of the financial reporting date, the final judgement on this case is still pending.

- (3) On March 25, 2010, DelSolar received an invoice from certain materials suppliers stated in the first paragraph, requesting payment of EUR\$4,979 thousand for certain purchases. This was considered by the supplier as a default of the contract. However, DelSolar believes the supplier had no ground to request payment and violated the memorandum of understanding (MOU) for the unit price modification mechanism signed on June 30, 2009. DelSolar sent a no default statement and debit note to the supplier, saying that it did not violate the contract and would like to negotiate the purchase transaction. As of March 2, 2011, based on the result of negotiation and for conservatism purpose, Delsolar estimated the loss on long-term purchase contract in the amount of \$678,166, and is presented under other current liabilities.
- 7) On September 25, 2010, DelSolar entered into a three-year solar cells development agreement (September 25, 2010 to September 24, 2013) with IBM. This technical cooperation is for commercial production of next generation thin film solar cell and obtains the joint patent. DelSolar should pay part of development costs. As of December 31, 2010, DelSolar had paid USD 2 million.

- (1) Financial assets and liabilities with fair values equal to book values
 - A. For short-term instruments, the fair values were determined based on their carrying values because of the short maturities of the instruments. This method was applied to cash and cash equivalents, notes and accounts receivable (including related parties), other receivables (excluding income tax refundable), other financial assets - current, short-term loans, accounts payable (including related parties), accrued expenses, other payables and other current liabilities.
 - B. The fair value of cash surrender value of life insurance is based on the book value at the balance sheet date.
 - C. The fair values of other financial assets-non-current, refundable deposits and guarantee deposits received are based on book values, which approximate present value.
 - D. The fair value of long-term loans is based on book value, which approximates present value.
- (2) The fair value of listed stocks which were recognized as financial assets at fair value through profit or loss is based on the closing price in open market at balance sheet date. The fair value of private placement of convertible bonds, which were invested before the adoption of EITF 99-256 of the Accounting Research and Development Foundation, R.O.C., dated October 8, 2010, "Accounting for private placement of convertible bonds" is measured at cost; while the fair value of those invested after October 8, 2010 is measured based on Binomial Stock Options Pricing Model.
- (3) The fair values of available-for-sale financial assets are based on the quotations in the active market, which are the latest quoted closing prices at the balance sheet date.
- (4) The fair values of derivative financial instruments which include unrealized gains or losses on unsettled contracts were determined based on the amounts to be received or paid assuming that the contracts were settled as of the reporting date.

3) Information on available-for-sale financial assets

The Group recognized the adjustment in equity from available-for-sale financial assets amounting to \$769,950 and (\$198,071), and the amount removed from equity and recognized in profit or loss was \$0 and \$63,546 for the years ended December 31, 2009 and 2010, respectively.

4) Information on interest rate risk positions

As of December 31, 2009 and 2010, the Group's financial assets with fair value risk due to the change of interest amounted to \$29,877,025 and \$31,067,784, respectively, and the financial liabilities with fair value risk due to the change of interest rate amounted to \$5,496,256 and \$8,326,810, respectively. The financial assets with cash flow risk due to the change of interest rate amounted to \$2,399,814 and \$2,039,920, respectively, and the financial liabilities with cash flow risk due to the change of interest amounted to \$9,250,985 and \$11,201,688, respectively.

5) Procedure of financial risk control and hedge

The main objective of financial risk control and hedge strategy is to reduce the loss of assets or liabilities (including forecast transactions) resulting from the exchange rate and interest rate fluctuations. The Group achieves financial hedge by entering into derivatives and all activities of hedge follow the principles listed below to achieve the objective of risk control:

- (1) Nature hedge
- (2) Not eroding the profit of main business
- (3) Not entering into the financial instruments besides the transaction currency
- (4) To execute stop-loss point
- (5) To execute the operating process

In monitoring control, the Group's Chief Financial Officer and the internal auditors should monitor and manage derivative transactions. Aside from evaluating the position twice a month, the authorized persons should monitor financial instrument transactions and the related profit or loss resulting from the transactions at any time. If any unusual event occurred, necessary actions should be taken and reported to the Board of Directors immediately. In addition, the performance of derivative transactions will be evaluated periodically to

determine if these transactions are in compliance with the operating strategy and the risk of these transactions is within the tolerable range of the Group. The Group has established the procedures for derivative transactions.

6) Information of major financial risk

(1) Certain transactions the Group involve non-functional currency which is exposed to exchange rate fluctuation. The information of foreign currency denominated monetary assets and liabilities which are significantly affected by exchange rate fluctuation is as follows:

(Foreign Currency : Functional Currency)

<u>Financial assets</u>	December 31, 2009		December 31, 2010

(2) Investments in equity financial instruments

Items	December 31,	
	2009	2010
Financial assets at fair value		
through profit or loss - listed and		
OTC stocks	\$ 4,039	\$ 4,760
Available-for-sale financial assets	1,257,827	1,450,275
Financial assets carried at cost	1,324,258	1,488,862

A. Market risk

The investments in equity financial instruments owned by the Group are exposed to price risk.

B. Credit risk

The Group assessed the credit condition of counterparties and default is not expected. Therefore, the possibility of credit risk is low.

C. Liquidity risk

- (A) The Group's investments in equity financial instruments which have active markets are expected to be sold easily and quickly in the market at the price close to their fair value.
- (B) The Group's investments in equity financial instruments without active markets are expected to have liquidity risk.

D. Cash flow risk due to changes in interest rate

The Group's investments in equity financial instruments are non-interest rate instruments; therefore, there is no cash flow risk related to changes in interest rate.

(3) Other financial instrument investments

Item	December 31,	
	2009	2010
Financial asset at fair value through profit or loss - private placement of convertible bonds	\$ 860,000	\$ 1,830,000
Investments in bonds without active markets	1,119,475	-

A. Market risk

- (A) The Group expects that structured time deposits and corporate bonds have no significant market risk.
- (B) The private placement of convertible bonds that the Group invested in have no quoted price in active market; thus, they are not affected by the changes in market price. Therefore, no significant market risk would arise.

B. Credit risk

- (A) The counterparties of the structured time deposits and corporate bonds invested by the Group are financial institutions which are all in good credit standing; therefore, the credit risk is extremely low.
- (B) The Group expects that the counterparty of the private placement of convertible bonds that it invested in is not likely to default; therefore, the credit risk is extremely low.

C. Liquidity risk

The Group's working capital is sufficient to support the capital demand of the Group. Therefore, the Group expects no significant liquidity risk.

D. Cash flow risk due to changes in interest rate

- (A) The future cash flows of the principal guaranteed financial instruments will fluctuate with the changes in market interest rate. Since these are principal guaranteed financial instruments, the market interest rate fluctuations will not reduce the cash flow of the principal.
- (B) Interest on the private placement of convertible bonds that the Group invested in accrues at fixed interest rate; therefore, there is no cash flow risk arising from interest rate fluctuations.

(4) Receivables

Items	December 31,	
	2009	2010
Notes receivable, net	\$ 99,507	\$ 328,038
Accounts receivable (including related parties), net	28,167,732	33,375,943
Other receivables	1,313,299	1,265,926

A. Market risk

The Group's receivables are all due within one year, therefore, the Group expects no significant market risk.

B. Credit risk

The Group's receivables are all approved through rigorous credit review procedures and some of which have to take out an insurance policy or provide necessary collaterals; therefore, the Group expects no significant credit risk.

C. Liquidity risk

The Group's receivables are all due within one year and their working capital is sufficient to support its capital requirements; therefore, the Group expects no significant liquidity risk.

D. Cash flow risk due to changes in interest rate

The Group's receivables are all due within one year; therefore, there is no significant cash flow risk due to changes in interest rate.

(5) Loans

Item	December 31,	
	2009	2010
Short-term loans	\$ 11,773,271	\$ 9,877,658
Long-term loans (including current portion)	2,973,971	9,650,840

A. Market risk

The loans of the Group have no significant market risk.

B. Credit risk

None.

C. Liquidity risk

The future cash flow is expected to be sufficient to cover the capital requirements of the Group; therefore, the Group expects no significant liquidity risk.

D. Cash flow risk due to changes in interest rate

The loans of the Group are issued at floating interest rate, accordingly, the future cash flow of which will fluctuate with the yield rate of these debt instruments. However, due to the short duration of the short-term loans, there is no significant cash flow risk due to changes in interest rate.

7) Information of derivative transactions

- (1) The balance of the Group's derivative transactions as of December 31, 2009 and 2010 are shown in Notes 4.2), 14) and 10.9). The related risk information are as follows:

A. Market risk

The Group entered into certain derivative contracts in order to hedge risk. Accordingly, no material market risk is expected.

B. Credit risk

The banks, which the Group deals with, are all in good credit standing and the Group deals with several banks to disperse the credit risk; therefore, the possibility that the banks will not comply with the terms of the contracts is low.

C. Liquidity risk

The Group has sufficient working capital; therefore no material liquidity risk is expected.

D. Cash flow risk due to changes in interest rate

The Group did not enter into any derivative contract that is interest rate related; therefore, no material cash flow risk due to changes in interest rate is expected.

8) Off-balance sheet financial instruments with credit risk

None.

9) Cash flow hedge

(1) Fair value hedge

The foreign currency demand for the subsidiaries is exposed to the risk resulting from fair value changes due to foreign exchange rate changes. The subsidiaries entered into foreign currency forward contracts which meet all criteria for hedge accounting. The related information is as follows:

<u>Designated for hedging instrument</u>		
<u>Hedge item</u>	Financial instrument was designated as <u>hedging instrument</u>	Fair value as of <u>December 31, 2010</u>
Receivables in foreign currencies	Forward exchange contracts	\$ <u>50,107</u>

(2) Cash flow hedge

In order to prevent the risk resulting from future cash flow fluctuation due to foreign exchange rate fluctuations, the Group entered into foreign currency forward contracts which meet all criteria for hedge accounting. The related information is as follows:

<u>Designated for hedging instrument</u>			Period of gain (loss)		
<u>Hedge item</u>	Financial instrument was designated as <u>hedging instrument</u>	Fair value as of <u>December 31, 2010</u>	Period of anticipated	anticipated to be recognized in	<u>income statement</u>
